- 2) The benchmark is FTSE Sharia Asia Pacific ex Japan in IDR terms.
- 3) The Net Asset Value / Unit has calculated the costs, including fees related to transaction and transaction settlement as well as administration and recording.

### Investment Manager Commentary

Asia Pacific equity market strengthened in June driven by global central banks dovish stance & positive expectations for the resumption of trade negotiations between US – China after G20 meeting. FTSE Sharia Asia Pacific ex Japan Index denominated in IDR accelerated by 4.43%. The G20 meeting resulted as expected, no deal but postponement of additional tariffs on China's products and Huawei is removed from the US black list. Global central bank accommodative stance support Asia's exchange rate and equity market. Korea and Singapore equity market posted highest monthly performance while India posted the lowest. Higher portfolio performance compared to benchmark driven by positive attribution from materials, energy, and consumer discretionary.
