#### **Investment Manager Commentary**

Indonesia bond market was volatile in May, pressured by higher trade tension between US and China. US raised tariff rate imposed on imports from China to 25% on USD250 billion products. The development was a big surprise to the market since the negotiation was repotedly going well and a deal was expected. Going forward, President Trump showed intention to incrase tariffs for goods imported from China if no trade deal is reached soon. To mitigate trade war impact to the economy, US central bank showed a more accomodative stance, prepared to support the economy through its policies. At the end of May, S&P rating agency raised Indonesia's sovereign rating from BBB- to BBB, providing positive surprise for the market. Indonesia USD bonds were more resilient amid global volatility. Portfolio allocation in short tenor bonds supported portfolio performance in May.
