- 3) The Net Asset Value / Unit has calculated the costs, including fees related to transaction and transaction settlement as well as administration and recording.

### Investment Manager Commentary

Asia equity positive performance in December as global investor sentiment improved. The market welcomed the conclusion of US election period, reducing uncertainty factor in the market. The market also welcomed positive news on vaccine development, concluding its third phase trial and gaining approval in various countries such as US and UK. Global vaccine rollout and expectation of recovery in 2021 turned global risk appetite more positive and also improve appetite for Asia equity. Portfolio allocation in real estate and communication contributed positive attribution, meanwhile allocation in consumer discretionary and industrials contributed negative attribution to performance.
