Note

 Annualized (1 year = 365 days) and using compound method (for products that have been more than one year old since inception).

 The benchmark is 80% Indeks Saham Syariah Indonesia + 20% net after tax of average 3-month mudharabah deposit's revenue sharing.

3) Based on GICS (Global Industrials Classification Standard).

 The Net Asset Value / Unit has calculated the costs, including fees related to transaction and transaction settlement as well as administration and recording.

Manulife Indonesia

Investment Manager Commentary

Sharia equity market posted mixed performance in May, where Indonesia sharia equity index closed lower 0.73%. Market sentiment improved as new Covid-19 cases decreased and various countries are planning to loosen lockdown and begin to open the economy gradually. The market also welcomed plans for additional stimulus from Europe and Japan to support the economy. Indonesia government also raised its fiscal stimulus from IDR405 trillion to IDR677 trillion for economic relief. Domestic economic activity remain weak amid social distancing (PSBB) period, indicated by inflation level that dropped in May to 2.19% YoY from 2.67% the previous month. Meanwhile, economic stability metric remain strong with forex reserves increase to USD130.5 billion in May from USD127.9 billion the previous month. Rupiah appreciated 1.8% against USD in May to 14,610. Portfolio allocation in materials and health care sectors posted positive attribution, while allocation in consumer staples and real estate posted negative attribution.
