- Based on GICS (Global Industrials Classification Standard).
- The Net Asset Value / Unit has calculated the costs, including fees related to transaction and transaction settlement as well as administration and recording.

Investment Manager Commentary

Indonesia equity market posted positive performance in August supported by optimism of economic reopening as COVID-19 cases improve in Indonesia. PPKM in Jakarta was lowered to level 3 in August as cases improve. The government targets lower fiscal deficit in 2022 to 4.85% of GDP, compared to 5.7% in 2021, indicating fiscal discipline stance that views favorably by the market. The government and Bank Indonesia also announced the extension of burden sharing scheme to 2022. The policy support government's budget funding, reduces interest payment and bond issuance. Macroeconomic condition remain strong where foreign exchange reserves reached USD144.9 billion, a record high level. Trade activity is positive amid strong global trade, where year-to-date trade surplus amounted to USD14.4 billion in July 2021. Market sentiment in China equity also recovers as the market views intensity of regulatory changes has peaked and the worst has passed for the market. Portfolio allocation in IT and consumer staples contributed positive attribution, meanwhile allocation in materials and financials contributed negative attribution to performance.
