Note

- Annualized (1 year = 365 days) and using compound method (for products that have been more than one year old since inception).
- 2) The benchmark is MSCI All Country World Information Technology Index.
- The Net Asset Value / Unit has calculated the costs, including fees related to transaction and transaction settlement as well as administration and recording.

Investment Manager Commentary

Global stock markets rose amid easing concerns over the Omicron variant which gave hope that its impact would only pose a lighter short-term drag on the world economy. The release of economic data showing economic resilience also supports sentiment. The Fed went more hawkish at the FOMC meeting in December, saying it would speed up the tapering pace and schedule for rate hikes. The amount of tapering will be enlarged so that the tapering process is expected to end in March 2022, faster than the previous estimate in June 2022. Interest rate projections are also higher where the Fed on the dot plot shows a projection of three rate hikes in 2022.
