### Note

- Annualized (1 year = 365 days) and using compound method (for products that have been more than one year old since inception).
- The benchmark is 80% Indeks Saham Syariah Indonesia + 20% net after tax of average 3-month mudharabah deposit's revenue sharing.
- Based on GICS (Global Industrials Classification Standard).
- The Net Asset Value / Unit has calculated the costs, including fees related to transaction and transaction settlement as well as administration and recording.

### Investment Manager Commentary

Indonesia equity market recorded a gain in December. Indonesia macro indicators continued showing recovery. New daily Covid-19 cases and hospital bed occupancy rates stayed low as mobility restrictions (with more leniencies in areas with improved Covid-19 situations) and vaccination progress continue. Foreign investors recorded a net inflow of USD100.5m, while Rupiah appreciated 0.48% MoM. Effective pandemic mitigation, high corporate earnings growth and IPO of big players in the new economy will provide supports for the equity market, while ineffective pandemic mitigation remains the main risk to the market. Successful execution of reforms is also a crucial factor to improve investor confidence, financial markets and the economy going forward. Portfolio allocation in financials and energy contributed positive attribution, meanwhile allocation in communication services and industrials contributed negative attribution to performance.

**Disclaimer:** This report is prepared by PT Asuransi Jiwa Manulife Indonesia only for information purposes and not to be used as a sales offering or proposal.
