Note

- Annualized (1 year = 365 days) and using compound method (for products that have been more than one year old since inception).
- The Net Asset Value / Unit has calculated the costs, including fees related to transaction and transaction settlement as well as administration and recording.

Investment Manager Commentary

Asia REITs market was volatile in June following The Fed FOMC meeting. The Fed was less dovish by revising expectation of first rate hike forward to 2023 from previous estimate of 2024, as US economic recovery and vaccination progress were better than expected. However, overall Fed monetary policy remain very accommodative with interest rate at very low level and asset purchases would continue until substantial further recovery has been made. Asia markets fell following The Fed's announcement, though the correction was short-lived and the markets recovered by the end of the month. Despite of market sentiment, Asia economy shows continued recovery supported by higher global demand as social restrictions were easing in many developed countries. As result Asia exports were strong, where South Korea exports grew 39.7% YoY, China 32.2% YoY, and Taiwan 35.1% YoY in June.
