							2.13%

Note

- 1) Annualized (1 year = 365 days) and using compound method (for products that have been more than one year old since inception).
- 2) The benchmark is 85% JCI + 15% NIFTY Index in IDR terms.
- 3) Based on GICS (Global Industrials Classification Standard).
- 4) The Net Asset Value / Unit has calculated the costs, including fees related to transaction and transaction settlement as well as administration and recording.

Investment Manager Commentary

US Treasury yield that continued to rise – driven by fear of higher inflation expectation resulted from huge stimulus and accelerated vaccination rollout – caused correction to equity market, especially to emerging market countries that previously enjoyed foreign inflows. Foreign investor booked monthly net foreign flow of IDR2.7 trillion. US dollar appreciated against major currencies; rupiah corrected by -2.0%. The Fed continued to communicate that policies will remain accommodative; inflation is not a concern as high unemployment will limit inflation. Bank Indonesia keeps supporting the economy through macroprudential policies such as leniencies in down payment for property and cars. Portfolio allocation in IT and financials contributed positive attribution, meanwhile allocation in industrials and materials contributed negative attribution to performance.
