- 2) The benchmark is MSCI China All-Share.
- 3) The Net Asset Value / Unit has calculated the costs, including fees related to transaction and transaction settlement as well as administration and recording.

### Investment Manager Commentary

China equity market posted positive performance in October. Concerns of government's regulatory reforms and the property sector receded. Study from Chinese government indicates that digital economy is crucial for enhancing productivity and international competitiveness. Meanwhile, the market was concerned by global supply chain disruption and rising COVID-19 case in China. China's approach of 'zero COVID' policy forces strict lockdown that risks economic growth. China manufacturing PMI fell to 49.2 in October from 49.6 the previous month, indicating contraction in manufacturing activity. China GDP growth fell to 4.9% YoY in Q3-2021 from 7.9% the previous quarter, amid policy reforms in various sectors and pressure in the property sector.
