- 2) The benchmark is FTSE Sharia Asia Pacific ex Japan in USD terms.
- 3) The Net Asset Value / Unit has calculated the costs, including fees related to transaction and transaction settlement as well as administration and recording.

Investment Manager Commentary

Asia equity market was volatile in October amid concern of global supply chain disruption and rising COVID-19 case in China. China's approach of 'zero COVID' policy forces strict lockdown that risks economic growth. China manufacturing PMI fell to 49.2 in October from 49.6 the previous month, indicating contraction in manufacturing activity. China GDP growth fell to 4.9% YoY in Q3-2021 from 7.9% the previous quarter, amid policy reforms in various sectors and pressure in the property sector. Apart from that, uncertainty from the global market also overshadowed the market with US debt ceiling negotiation in US Congress and The Fed's monetary policy. Portfolio allocation in healthcare and materials contributed positive attribution, meanwhile allocation in financials and consumer staples contributed negative attribution to performance.
