Note

- 1) Annualized (1 year = 365 days) and using compound method (for products that have been more than one year old since inception).
- 2) The benchmark is MSCI All Country World Information Technology Index.
- 3) The Net Asset Value / Unit has calculated the costs, including fees related to transaction and transaction settlement as well as administration and recording.

Investment Manager Commentary

Global technology equity was weaker in April overshadowed by negative sentiments from the global markets. US central bank reiterate its priority to battle inflation that reached its highest level in 40 years. Russia - Ukraine conflict continues to weigh on investor sentiment as global commodity prices remain elevated and puts pressure on inflation. In Asia, rising COVID-19 cases in China causes lockdown in several key industrial cities such as Shanghai and Shenzhen that can put pressure on global supply chain and growth outlook. Chinese government pledged more stimulus to spur the economy through monetary and fiscal stimulus to ensure the economy grows in reasonable range. In the current environment, we maintain our exposure to long-term secular themes within the portfolio. Technology companies in cloud computing, e-commerce, and gaming are likely to benefit from increased adoption from both enterprises and consumers. Despite of recent market correction, fundamentals and the long-term outlook of the sector remain unchanged.
