Investment Manager Commentary

Indonesia equity market outperforming global market, Asia market and emerging market. Resilient macro fundamentals, robust 1Q23 corporate earnings and strong Rupiah help spur investor sentiment. There is positive net foreign inflow of USD828.2million in April. Rupiah strengthened 2.15% outperforming other currencies in ASEAN, supported by initiatives to allure export revenues. FOMC meeting resulted in a much anticipated 25bps Fed funds rate hike to a 5.00-5.25% range. The meeting result also provides a hint of a pause in rate hike while the central bank will continue to be data-dependent in its policy. Portfolio allocation in consumer discretionary and IT contributed positive attribution, meanwhile allocation in financials and industrials contributed negative attribution to performance.
