Monthly Performance Last 3 Years

Note

- 1) Annualized (1 year = 365 days) and using compound method (for products that have been more than one year old since inception).
- 2) The benchmark is IDX SMC Liquid Index in IDR terms.
- 3) Based on GICS (Global Industrials Classification Standard).
- 4) The Net Asset Value / Unit has calculated the costs, including fees related to transaction and transaction settlement as well as administration and recording.

Investment Manager Commentary

Indonesia equity market underperforming the regional, emerging market and the global market. There was strong appetite on North Asia markets, triggered by China economy reopening, that came at the expense of markets such as Indonesia and Malaysia, previously enjoying foreign inflows. There was net foreign outflow on the Indonesia equity of -USD204m. Indonesia benchmark rate is expected to reach its highest in 1H23. The economy reopening will provide supports for the equity market. Post the terminal rates, we expect markets will be more stable and investor appetite to improve. Portfolio allocation in financials and health care contributed positive attribution, meanwhile allocation in consumer staples and energy contributed negative attribution to performance.
