Investment Manager Commentary

Equity market was volatile in March due to concern of banking stress in the US and Europe. The collapse of several US banks and Credit Suisse in Europe raised concern of financial crisis like in 2008. However, quick reaction from the regulators managed to calm the markets and avoid wider contagion risks. Market sentiment also supported by expectation of The Fed nearing its peak rate hike cycle. Despite of global volatility, Indonesia domestic macroeconomy remain solid. Inflation continues to moderate, fell to 4.97% in March, a positive sign for purchasing power. External sectors also remain solid with better than expected trade surplus at USD5.5 billion in March. Rupiah appreciates 1.74% against USD to 14996 per USD. Foreign investors posted net inflow IDR4.1 trillion in Indonesia equity despite of risk-off sentiment globally. Portfolio allocation in materials and IT contributed positive attribution, meanwhile allocation in energy and financials contributed negative attribution to performance.
