Investment Manager Commentary

Indonesia financial market condition remain stable in May amid volatile global market condition. The global markets were overshadowed by concern of US debt ceiling crisis and worry over hawkish Fed's tendency. However, Despite woes on the global market, the market remained profoundly robust supported by continuous improvement on the domestic macro fundamental. Inflation continues to moderate in May to 4% YoY, back to BI's target range 2%-4% that opens the possibility of rate cut. Other positive development in the month was Government reported budget surplus of IDR234 trillion as of April 2023 that indicates prudent fiscal management and opens the possibility of lower bond issuance target for the year.
