### Investment Manager Commentary

Equity market was again under pressure in December amid stronger USD and lower expectation of Fed rate cut in 2025. The Fed's latest projection indicate a more gradual approach of rate cut with only 50bps cut for 2024, lower than 100bps in the previous forecast. Domestically, VAT rates increase plan was ultimately cancelled by the Finance Minister ahead of New Year's eve. Meanwhile the IDR38 trillion stimulus to buffer VAT hike remain in place for 2025, a positive factor to further support purchasing power. Bank Indonesia maintained BI Rate unchanged at 6% citing pressure on IDR amid stronger USD environment. BI emphasized policy focus to strengthen Rupiah stability. Domestic inflation came in at 1.57% YoY for 2024, a record low level. Meanwhile Chinese equities were higher in the month buoyed by optimism of further stimulus, following the government's comment of a more proactive fiscal policy and looser monetary policy. Portfolio allocations in IT contributed positive attributions, meanwhile allocations in utilities contributed negative attributions to performance.
