### Investment Manager Commentary

Bond market continued its positive trend in September following rate cut from The Fed and Bank Indonesia. The Fed cut benchmark interest rate by 50bps, an aggressive start to its first easing in four years. This marks the beginning of long rate cycle, with Fed's dot plot indicates further cut of another 50bp cuts by YE24, 100bp cuts by YE25 and 50bp in 2026. Bank Indonesia also surprised by cutting BI Rate 25bps as the Central Bank sees strong IDR and anticipates Fed cut. Rupiah appreciated 2% to 15,140 /USD in the month amid weaker USD and strong foreign inflow to Indonesian market. Foreign investors posted net buy USD1.3 billion in the bond market and USD1.4 billion in the equity market that supported the Rupiah. The 10Y INDON yields continued its downward trend from 4.72% to 4.64% (-12bps), on the same page with declining 10Y US Treasury yields from 3.90% to 3.78% (-12bps).
