Investment Manager Commentary

Bank Indonesia surprised the market by cutting BI Rate 25bps to 5.0%, its fourth rate cut this year. BI indicate further potential to cut interest rate amid low domestic inflation and transmission of rate cut to lending rate remain slow. Domestic inflation came down to 2.31% YoY from 2.37% the previous month, indicating weak domestic activities. Bank Indonesia reported loan growth dropped to +7.03% YoY in July from +7.77% the previous month, indicating weak business sentiment. Meanwhile GDP growth 2Q-2025 came in stronger than expected at 5.12% YoY from 4.87% the previous quarter. Growth was driven by gross fixed capital formation that grew +7% YoY. Foreign investors posted net inflow USD676 million in the equity market. Going forward, acceleration in government spending is expected to be key catalyst for the economy in the short-term. Portfolio allocations in material contributed positive attributions, meanwhile allocations in energy contributed negative attributions to performance.
