### Investment Manager Commentary

April was a volatile period for the market, where early in the month the market was surprised by US reciprocal tariff announcement that are bigger than expected. However market sentiment improved following US decision to postpone the tariff for 90 days, allowing time for negotiations. The market also welcomed the decision to relax tariffs on several sectors (electronics and automotive), while optimism on positive trade negotiation continue to drove the market higher. On the domestic front, improvement of state budget position is a positive sentiment, especially on improvement in tax revenue. The finance minister also stated that budget reallocation process is concluded and the government will focus on policy implementation. GDP growth for 1Q-2025 fell to 4.87% from 5.02% in 4Q-2024. Growth was weighed by weaker household consumption, government spending, and investment. Meanwhile, Bank Indonesia maintained BI Rate at 5.75% in April, emphasizing that policy focus is on Rupiah stability. Portfolio allocations in materials contributed positive attributions, meanwhile allocations in financials contributed negative attributions to performance.
