**Investment Manager Commentary**

The equity market posted positive performance in December during period of relative quiet. The Fed cut Fed Funds Rate (FFR) by 25bps inline with market expectation to 3.50%-3.75%. Fed Chair Powell indicated that interest rate is on neutral range and further rate cut is subject to economic data. On the domestic front, high frequency economic data showed improvement. Retail sales grew +5.9% YoY in November, the highest since March 2024, and consumer confidence went up to 124.0, the highest since February 2025. Bank Indonesia maintained BI Rate at 4.75% inline with expectation. BI showed balance posture, emphasizing Rupiah stability while open to the possibility of further rate cut. Foreign investors posted net inflow of USD732 million to Indonesia equities in the month. Portfolio allocations in materials contributed positive attributions, meanwhile allocations in communication contributed negative attributions to performance. Looking ahead, domestic growth is expected to improve in 2026 due to accommodative fiscal and monetary environment. The market will focus on potential acceleration of government spending, sustainability of fiscal position, and geopolitical environment.
