Investment Manager Commentary

Equity market posted negative performance in February due to uncertainty on US tariff policy and concern on weak domestic growth. President Trump affirms that 25% against imports from Canada and Mexico will proceed in early March, along with 10% additional tariff against China. President Trump also indicate that further tariffs would follow in April, to impose reciprocal tariffs against countries that imposed tariffs on US. Domestically, concerns on weak domestic growth and uncertainty on government policy transition weighed on market sentiment. There was deflation -0.09% YoY in February, seen by the market as indication of weak domestic consumption. Meanwhile the government announced further budget efficiency to reach IDR750 trillion to be reallocated to priorities program such as Free Nutritious Lunch program, and forming Danantara. Bank Indonesia maintained BI Rate at 5.75% amid weak Rupiah that depreciated -1.7% against USD to 16,580. However BI maintains outlook of further rate cut to support domestic growth. Portfolio allocations in materials contributed positive attributions, meanwhile allocations in IT contributed negative attributions to performance.
