Investment Manager Commentary

Asia Pacific equities were positive in July. Market sentiment was driven by easing of tariffs and trade tensions as several key economies reached trade deal with the US. Strong earnings in the technology sector also buoyed appetite towards Asia technology stocks, driven by expectation of strong capital expenditure investment on AI. The US Federal Reserve kept policy rates unchanged in July and was non-committal over its next policy meeting decision in September 2025. The market continued to price in another two rate cuts by the end of 2025. Meanwhile India was a key underperformer as an unexpectedly high 25% US tariffs triggered volatility and foreign outflow. Portfolio allocations in consumer discretionary contributed positive attributions, meanwhile allocations in healthcare was detractor to performance.
