Investment Manager Commentary

Asia Pacific equities continued its positive momentum despite of escalation in geopolitical tension. Israel - Iran conflict overshadowed the market, as oil prices spike and raises concern on inflation. Brent oil price rose 23% to USD78 per barrel amid the conflict, before subsiding to USD67 following ceasefire. The Fed maintained benchmark rate at 4.25%-4.50% inline with market expectation. Fed Chair Powell indicate The Fed is in no rush to cut rates, tentative on the impact of tariffs to the economy. Market sentiment in Asia was supported by signs of progress in US tariff negotiations with several Asian countries such as China and India. Sustained weakness of USD and strong earnings from major technology firms also boosted Asia equities. China and Hong Kong equities delivered positive return through combination of improving economic data and renews investor optimism. Taiwan equities benefitted from sustained global demand for AI while South Korea enjoyed renewed optimism after pro-economic reform presidential candidate won the election. Indian equities rose after larger than expected interest rate cuts of 50bps were announced. Portfolio allocations in IT contributed positive attributions, meanwhile allocations in healthcare was detractor to performance.
