Investment Manager Commentary

Indonesia equity posted positive return in March following correction in the previous month. Foreign investors continued to record outflows -USD489.7m, although much lower than the -USD1.1b in the previous month. Market sentiment remain fragile overshadowed by uncertainty on global trade outlook as the US began to ramp up tariffs. The market awaits new tariff announcement, as President Trump will announce new tariff measures in early April. In March, inflation was up to +1% YoY reversing from a deflation of -0.1% YoY in the previous month as electricity tariff discount ended. Meanwhile, core inflation is stable at +2.5% YoY. Bank Indonesia decided to keep benchmark interest rate unchanged at 5.75%, reflecting a cautious stance amid persistent global uncertainties and risks to Rupiah. Portfolio allocations in financials contributed positive attributions, meanwhile allocations in energy contributed negative attributions to performance.
