### Investment Manager Commentary

September was a month full of policy updates. In the beginning of the month the market was overshadowed by riots in several cities in Indonesia, and cabinet reshuffle that includes changes in finance minister post. The reshuffle of finance minister led to uncertainty in the market in regards to government's fiscal discipline outlook. Meanwhile the government introduced new measures that include liquidity injection of IDR200 trillion from cash reserve balance to SOE banks, and new stimulus package '8+4+5' worth IDR16.2 trillion, the third stimulus package this year, aiming to improve bank liquidity and supporting purchasing power and labor absorption. The government also revised 2026 budget by raising fiscal deficit target to 2.68% of GDP from 2.48% in the previous draft. Bank Indonesia surprised the market again by lowering BI Rate by 25bps to 4.75%, its third consecutive rate cuts. BI still sees further room to cut rate amid low domestic inflation and the need to boost domestic growth. From the global market, The Fed cut benchmark rate by 25bps inline with market expectation, and projects faster and bigger rate cuts in 4Q25 - 2026 period compared to previous estimates due to weaker labor sector. Portfolio allocations in material contributed positive attributions, meanwhile allocations in komunikasi contributed negative attributions to performance.
