Investment Manager Commentary

The equity market fell in January amid volatility in the global and domestic markets. Geopolitical risks heightened in the month following US military action to capture Venezuela President Maduro. President Trump also threaten to raise tariffs on several European countries that oppose US plan to acquire Greenland. The market also shaken by the concern on The Fed's independence following the investigation on Fed Chair Jerome Powell regarding renovation of The Fed headquarter. On the domestic front, the market is concerned by aggressive fiscal posture for 2026 following wider than expected 2025 fiscal deficit. The government reported 2025 fiscal deficit of IDR695.1 trillion or 2.92% of GDP, exceeding target 2.78%. MSCI announced temporarily freezes the rebalancing of Indonesian stocks due to concerns regarding the transparency of stock ownership structures, causing market correction at the end of the month. MSCI indicates possible reduction of Indonesia stock weighting or reclassification from emerging markets to frontier market that can trigger foreign outflow. India equities also posted negative return amid uncertainty on tariff negotiation with US and rising oil prices. Portfolio allocations in utilities contributed positive attributions, meanwhile allocations in materials contributed negative attributions to performance.
