### Investment Manager Commentary

Domestic markets were volatile due to dynamic condition in the global and domestic markets. On the global front, UST 10Y yield rose to 4.66% due to stronger than expected US inflation. This led to concern that The Fed may have to raise interest rate to rein in inflation pressure. On the domestic side, depreciation of Rupiah became a key concern. The currency weakened by -3.0% against the USD to 17874, a faster pace compared to the -2.1% depreciation in the previous month. This situation prompted the government to focus on maintaining stability through policies aimed at strengthening foreign exchange reserves. The government announced revisions to the DHE (Export Proceeds) policy. In addition, President Prabowo introduced a policy to centralize exports of strategic commodities (coal, CPO, and ferroalloys) to prevent foreign exchange leakage due to practices such as under-invoicing and transfer pricing. However, this policy also created uncertainty regarding its implementation and potential impact on companies in the mining sector. Meanwhile, Bank Indonesia surprised the market by raising the BI Rate by 50 basis points to 5.25% (versus market consensus of 25 basis points). This aggressive move signals BI's strong commitment to maintaining Rupiah stability and reinforcing the credibility of its monetary policy. Bond yield were mixed with the short-end rising while the mid-long tenor stable. The 2-year yield rose +38bps, while the 15-year yield fell -12bps.
